

NATURAL RESOURCE & CONSERVATION MANAGEMENT

B.S. in Natural Resource & Conservation Management at Thomas University

Conservationists protect and sustain our world's natural resources for future generations. Students interested in the Natural Resource and Conservation Management Program at Thomas University will be provided with the academic background and professional training to pursue careers in this rapidly growing field.

Natural resource conservation is a multi-disciplinary field that integrates rigorous academic training in the natural, conservation, and geospatial sciences. Students will solve complex conservation problems through hands-on interdisciplinary approaches. This degree provides a challenging and rewarding experience while simultaneously preparing the student for careers in resource planning, management, conservation, restoration and education within the field of natural resources.

CURRICULUM

General Education

Composition I
Composition II
Oral Communication for Professionals
University Studies
College Algebra
Statistics
Science elective (1 classes)
Inquiry electives (2 classes)
Creativity electives (2 classes)
Cultural Foundations electives (3 classes)

Major Courses

Biology I and II
Chemistry I
Topography and Navigation
Botany
Ecology
Physical Science
Environmental Science
GIS I and II
Conservation Science
Environmental Systems
Remote Sensing
Community GIS
Zoology
Senior Seminar or Internship

Minor/Electives 24 credits

TOTAL CREDITS

120
